Objective

Motivated and detail-oriented Full Stack Developer with hands-on experience in Angular, Spring Boot, JavaScript, and PostgreSQL. Passionate about building responsive web applications and RESTful APIs while continuously learning new technologies. Seeking an opportunity to contribute to a dynamic software development team.

Education

- **Master Of Computer Application** 2026
  St.Xavier's college, Tirunelveli.
  CGPA - 7.4

- **Bachelor Of Science in Computer Science** 2024
  St.John's college, Tirunelveli.
  CGPA - 7.6

Experience

- **Full Stack Developer Intern (with stipend) - JP Nagar Bengaluru** December 2025 - March 2026
  Antique Network Solutions Prvt Limited (Payfin)
  · Developed a role-based Human Resource Management System (HRMS) using Angular, Spring Boot, and PostgreSQL.
  · Implemented JWT authentication and role-based access control.
  · Built RESTful APIs for employee, leave, payroll, and attendance management.
  · Designed responsive user interfaces and integrated frontend with backend services.
  · Gained exposure to fintech payment concepts, including pay-in and pay-out workflows.

Skills

- Web Technologies : HTML, CSS, JavaScript
- Frontend : Angular, React.js, Tailwind CSS
- Backend: Spring Boot, Python, Node.js
- Tools & Platforms: Git, GitHub, Visual Studio Code, IntelliJ IDEA, Postman, pgAdmin
- Database - PostgreSQL, MySQL

Projects

- **Human Resource Management System - March 2026**
  A full-stack, role-based Human Resource Management System (HRMS) developed during my internship at Antique Network Solutions Pvt. Ltd. (Payfin) to automate HR operations and improve organizational efficiency. Built using Angular, Spring Boot, PostgreSQL, and Tailwind CSS, the application includes employee management, attendance tracking, leave management with multi-level approvals, payroll processing, payslip generation, team management, and ticket management. Implemented JWT-based authentication, refresh tokens, and role-based access control to ensure secure access for different user roles and efficient management of HR activities.

- **Virtual Gateway to Ornamental Fish Farming - October 2025**
  Developed a web-based platform to support ornamental fish farming by providing information on fish species, breeding techniques, feeding practices, and aquarium maintenance. Integrated an online shopping feature for purchasing ornamental fish, fish food, fish tanks, and aquarium accessories. Designed the platform to help users explore fish farming resources, browse products, and access essential aquarium supplies through a centralized interface. The project aimed to promote ornamental fish farming, simplify access to related products, and provide a convenient digital platform for aquarium enthusiasts and fish farmers.

- **IoT-Based Smart Home Automation System - 2023**
  Developed an IoT-based home automation system to remotely control household fans and lights through a mobile application. Integrated NodeMCU (ESP8266) with relay modules to enable wireless switching of electrical appliances. The project aimed to simplify home appliance management, improve user convenience, and demonstrate the practical application of Internet of Things (IoT) technology in smart homes.

- **Automatic Smart Plant Watering System -2022**
  Developed an automated plant watering system using Arduino Uno, a soil moisture sensor, a relay module, and a water pump to monitor soil moisture levels and provide water when the soil becomes dry. Integrated the sensor with the Arduino to detect moisture conditions and automatically activate the water pump when the moisture level falls below the required threshold. The project aimed to simplify plant care, reduce manual watering efforts, and promote efficient water usage through automation.

Certifications

- **NPTEL – Programming in Java**
  Completed an NPTEL certification course in Programming in Java, gaining foundational knowledge of Java programming, object-oriented programming concepts, data types, control structures, classes, objects, inheritance, and exception handling.

- **NPTEL – Programming in Modern C++**
  Completed an NPTEL certification course in Programming in Modern C++, gaining knowledge of C++ programming fundamentals, object-oriented programming, functions, classes, templates, memory management, and modern C++ features.

- **NPTEL – Cyber Security and Privacy**
  Completed an NPTEL certification course in Cyber Security and Privacy, gaining foundational knowledge of cybersecurity principles, data privacy, network security, common cyber threats, encryption, authentication, and secure digital practices.

- **NPTEL - Retail Management**
  Completed an NPTEL certification course in Retail Management, gaining foundational knowledge of retail operations, merchandising, customer relationship management, retail marketing, and store management.
